Planning and Measurement

Project Management

Financial and Budget Management

Risk Management

Learning Management

Service Planning

Business Planning

Workforce Planning

Specialist Planning

Business Intelligence

Personnel Evaluation

Stakeholder Engagement

Integration

CAMManagement  
Solutions

### interplan® Executive

interplan® is a truly integrated planning and performance management system which provides a single system to plan, monitor and report on all activities.

### Budget Management Centre (BMC)

BMC integrates budgets with the planning and performance management reporting framework and allows flexible workflow functionality.

### Learning Management Centre (LMC)

LMC allows an organisation to train, empower and build the capacity of their staff through e-training. LMC is cost effective and maximises acceptance of new systems.

### Interactive Business Planning (IBP)

IBP enables business plans to be developed and delivered through a series of interactive workshop exercises: to train, empower and build the capacity of staff.

### Shuttle Plans System (SPS)

SPS integrates all stand-alone plans throughout an organisation into a single system for management of key activities, plans and strategies.

### Power Data (PD)

PD leverages the Microsoft BI Platform to provide critical linkages between our system and organisations' data for analysis, reporting and exporting.

### Personnel Evaluation System (PES)

PES embeds an organisational culture that aligns individual performance against projects and measures with staff development plans and appraisals.

### Integrated Project Manager (IPM)

IPM provides an effective system for the assessment, prioritisation and implementation of organisation-wide projects to ensure they assist in achieving strategic goals.

### Integrated Risk Manager (IRM)

IRM integrates with the planning process and allows the identification, analysis, assessment, mitigation & monitoring of corporate, business planning and project risks.

### Interactive Service Review (ISR)

Improve service delivery, increase productivity and create financial savings using CAMMS ISR.

### Workforce Planning Centre (WPC)

WPC allows online analysis of structural reviews and organisation changes as well as multiple scenario analysis, to accurately develop human resources plans and costs.

### Executive Intelligence System (EIS)

EIS consolidates organisation-wide performance information to facilitate decision making. It includes drill downs, snapshots of performance and exception reporting.

### Integration (I)

Integration with CAMMS products will maximise the potential of existing core business systems and avoids duplication and ensures the integrity of information.

### Community Connect Portal (CCP)

CCP provides organisations with an outward facing, sophisticated online portal for engaging, consulting and partnering with the community and stakeholders.
